

# Digital Yacht SPL250 AIS Transponder-VHF Antenna Splitter

The Digital Yacht Class B AIS VHF Antenna splitter is designed to simplify installation of the Digital Yacht range of Class B Automatic Identification Systems (AIS).

The unit removes the need for a separate VHF antenna for an AIS transponder and allows a single antenna to be shared with a VHF radio. This is the only VHF antenna splitter suitable for use with two transmitting devices.

## **Features:**

### **Simplifies installation**

Use a single VHF antenna for both AIS and VHF operation. Save installation cost and time.

### **Failsafe operation**

Guarantees priority to VHF voice & DSC radio operation, even if the splitter power supply fails.

### **FM Antenna connection**

Additional output for FM radio antenna connection.

### **Compatible with Class B AIS Transponders**

The only antenna splitter suitable for use with Class B transponders. Compatible with all Class B AIS transponders.

### **LED Status indication**

Simple LED indicators show when VHF voice radio or AIS is transmitting or receiving.

### **Connecting leads provided**

Includes RF leads for connection with AIS transponder, VHF radio, and a power lead
